

# Paper Spider Web Craft

An at home, fun spider themed, craft activity for Ages 7-12 (can be modified for younger or older children). Provided by Gumbo Limbo education staff.

\*Parental Supervision may be needed\*

1. Gather your materials: You will need construction paper/printer paper/or parchment paper, scissors, and a pencil.
2. Take paper and make a square. The easiest way to do this is by folding the paper in half diagonally and then cutting the edge.

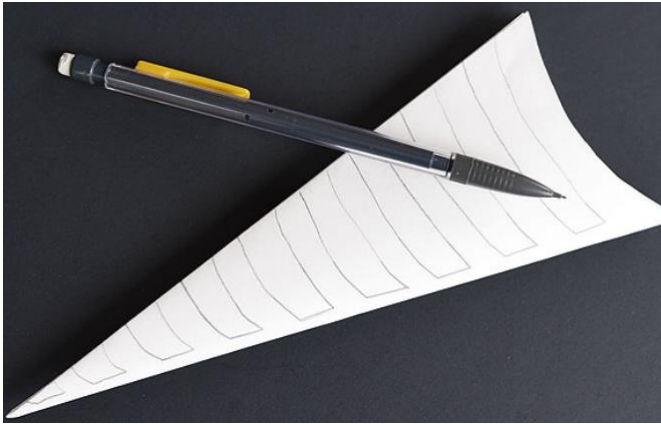

3. Once the square is made, fold it diagonally in half to make a triangle shape. Fold again to make another triangle shape. Fold once more into another triangle.
4. Next, bring the right edge of the triangle over to the left edge of the triangle. Make sure the edges line up! Fold as shown below.

5. Trim off the extra paper that is not included in your newly formed triangle.
6. Cut the end again, this time with a slight inwards curve. This will add a design to your spider web.

7. You are about to start cutting to form your spider web! Draw where you would like to cut for your web, you can make straight lines, squiggly lines, wavy lines, etc...

8. Cut out your lines. Just make sure you don't fully cut across!
9. Once you are finished cutting, unfold and look at your creation!
10. Your child now has an awesome paper web craft! Enhance with the addition of spiders!
